PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) with hands-on internship experience in PHP/MySQL web application development and Python-based machine learning for computer vision. Adept at translating concepts into practical, real-world solutions, with a strong ability to quickly learn new tools and frameworks. Seeking to contribute as a software engineer within a forward-thinking organization that values continuous learning, innovation, and purposeful, impactful engineering.

EDUCATION

B.E. Computer Science and Engineering — 84% <i>Dr. Sivanthi Aditanar College of Engineering</i>	2026
Class 12 — 92.34% <i>Sarada Matriculation Higher Secondary School</i>	2022
Class 10 — 89.8% <i>M.M. Matriculation Higher Secondary School</i>	2020

INTERNSHIP EXPERIENCE

Smackcoders Dec 2025 – Jun 2026, Tirunelveli
PHP Intern

- Developed and maintained dynamic, database-driven web applications using PHP and MySQL.
- Worked alongside the development team to debug, test, and refine application features, building hands-on full-stack development experience.

Taras Systems and Solutions Jul 2025 – Aug 2025, Coimbatore
AIML Using Python Intern

- Built and deployed YOLOv5 and other machine learning models in Python for real-time computer vision applications.
- Applied data preprocessing and model evaluation techniques to support accurate, real-time object detection.

PROJECTS

AI-Powered CCTV Surveillance System

- Designed an AI-driven surveillance system that detects, tracks, and recognizes faces in real time to strengthen security monitoring.

Blind Assistance Navigation System

- Built a real-time navigation system for visually impaired users, combining YOLOv5 object detection with Deep SORT tracking and OCR-based text recognition to identify obstacles, predict hazards, and read signs and labels.
- Delivered real-time audio and text feedback and optimized the pipeline for speed and accuracy, improving mobility, confidence, and safety for users.

Younger Generation Habit Analysis

- Built a web-based platform (PHP, MySQL, Java/Weka) to monitor habits such as physical activity, reading, and screen time, and flag risk patterns like addiction or academic decline using SVM, Random Forest, and ANN models.
- Random Forest delivered the best results (95.70% accuracy, 96.4% precision, 95.7% recall, 99.9% ROC area), with automated email alerts to users and administrators supporting early intervention.
